

# ***Eastlex Machine Corp.***

***Manufacturer of Special Application Machinery***

Dear Friends:

It was in 1956 that our company made a very humble beginning in New York City. Our aim has always been to design machines that are dependable and easy to service should the need arise. Consistent hard work and, most of all, the blessings of God, have made Eastlex Machine Corporation a modern design and manufacturing facility.

This site will introduce you to equipment that has been well accepted and has given years of productive and dependable service with lasting value.

Should you ever be in the Lexington area, please feel free to visit with us.

Sincerely,

Andrew Schmidt
